OPENING NEW HORIZONS FOR BUSINESS

The world is rapidly moving towards decentralized technologies, and **OPINCUR BUSINESS ALLIANCE** is your key to successful integration into Web 3.0. We are building a unique ecosystem where entrepreneurs, investors, and users can interact efficiently using transparent, secure, and innovative blockchain solutions.

OUR GOAL is not just to offer a platform but to create a hub of opportunities that will accelerate the growth of your business and open new horizons.

WHAT DO WE OFFER?

OPINCUR BUSINESS ALLIANCE is much more than just a platform. We are developing a dynamic and flexible ecosystem for businesses, providing all the necessary tools for growth and expansion in the digital Web 3.0 era

- **ACCEPT CRYPTOCURRENCY PAYMENTS FOR GOODS AND SERVICES** Easily integrate crypto payments into your business and expand your audience.
- **GUARANTEED TRANSACTION SECURITY** Funds are locked until all obligations are met, minimizing risks.
- **FLEXIBLE COMMISSION SYSTEM** We adjust fees based on your business volume, helping you save on transaction costs.
- **PROMOTION IN WEB 3.0** We help your business access the new digital market and reach a global audience.
- **CONNECTING PARTNERS AND INVESTORS** Join a community where partners, entrepreneurs, and investors come together for mutual growth.

BUSINESS

CLIENTS

OPINCUR BUSINESS ALLIANCE / TRUST is the foundation of successful business, and we understand that. We address one of the biggest challenges in traditional trade—the lack of trust between buyers and sellers. Our blockchain solutions ensure complete security, while our funds-locking system makes every transaction transparent and fair, so you can be confident in the outcome!

1

YOU ORDER A PRODUCT OR SERVICE (for example, a package to be delivered in a month or a website to be built). You and the seller quickly agree on the timeline, and this agreement is recorded in a smart contract—a trusted digital assistant that oversees the deal.

2

CRYPTO ASSETS ARE LOCKED IN THE SMART CONTRACT. The seller cannot access them until they fulfill their obligations. This ensures fairness: the seller knows the crypto assets are secured, and you're confident that they'll only be released once everything is completed as promised!

3

CHECK IF EVERYTHING IS DONE CORRECTLY. The seller sends the package or completes the service (e.g., delivers your finished website). You review it to ensure everything meets your expectations.

4

IS EVERYTHING GOOD? The crypto assets are automatically released to the seller. If the agreed-upon time passes and you haven't raised any complaints, the smart contract automatically transfers the crypto assets to the seller. You receive your package or service, they get their crypto assets—everyone's happy! Alternatively, if the seller completes the work early and you're satisfied, you can press "Approve Now" to release the crypto assets to them sooner.

SOMETHING WRONG? If the seller fails to deliver the package or complete the service, press "File a Complaint" before the deadline. We'll investigate: if the seller has fulfilled their obligations correctly, they'll receive the crypto assets. If not, we'll step in to ensure you're satisfied with the resolution!

FLEXIBLE COMMISSIONS

OUR UNIQUE COMMISSION SYSTEM is not just a way to reduce expenses. It is a strategic tool designed to stimulate your business growth. The more trust in our CIO token, the more profitable it becomes for you to operate.

FLEXIBLE COMMISSION STRUCTURE

PAYMENTS / SOL, USDC, ...	PAYMENTS / CIO
\$1,000 PER MONTH → 2.5%	\$1,000 PER MONTH → 2%
\$1,000 TO \$10,000 → 2%	\$1,000 TO \$10,000 → 1.5%
\$10,000 TO \$50,000 → 1.5%	\$10,000 TO \$50,000 → 1%
\$50,000 AND MORE → 1%	\$50,000 AND MORE → 0.5%

USE CASE EXAMPLE Imagine an online store that starts accepting cryptocurrency. Initially, it pays a standard commission of 2.5%. As sales volume grows, the commission automatically decreases — to 2%, then 1.5%, and can go as low as 1%. If the store begins using its internal token, CIO, the commission drops even further — down to 0.5%. This helps significantly reduce costs, making prices more attractive for customers and accelerating business growth. Not only does this lower expenses, but it also offers customers unique benefits, making purchases even more rewarding and encouraging repeat buying.
